

RisPlan^{web}

Risnova's web module boosting RisPlan's scheduling functions

HR Managers and supervisors:

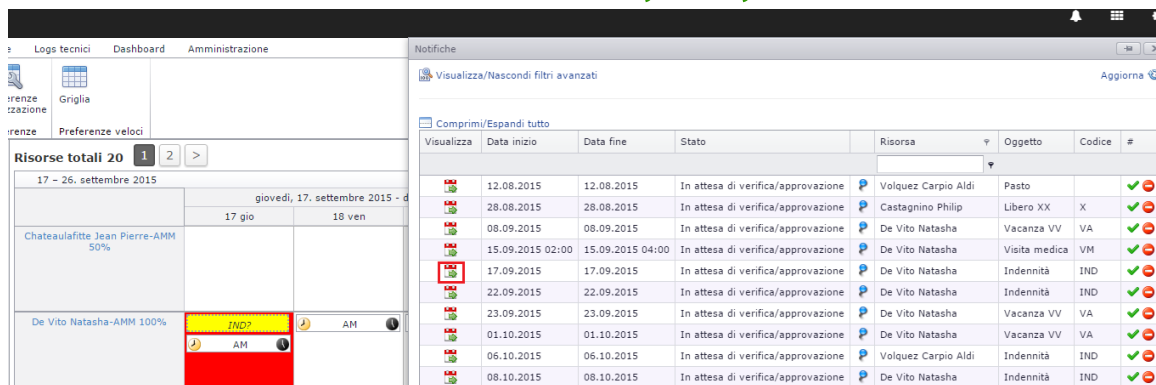

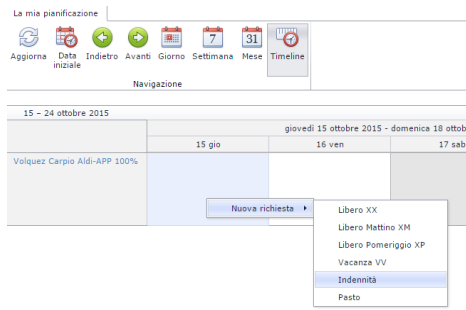

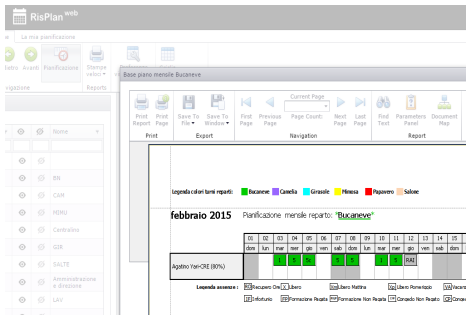

- Access online real-time information on your workforce's planned shifts in mobility, within and without your company
- Receive requests from your workforce (for leave, illness, refunds). Acknowledge, then approve or deny them with a click, even at different organizational levels. See them immediately displayed and integrated within your shiftplanner
- Work more efficiently: share your resources' shifts information with other managers or workteams

Workforce:

- Online access to personal shifts, constantly updated
- Send in applications for holidays, days off, refunds with a few clicks directly from **RisPlan^{web}**
- Customizable personal shifts/roster or holiday printouts always available

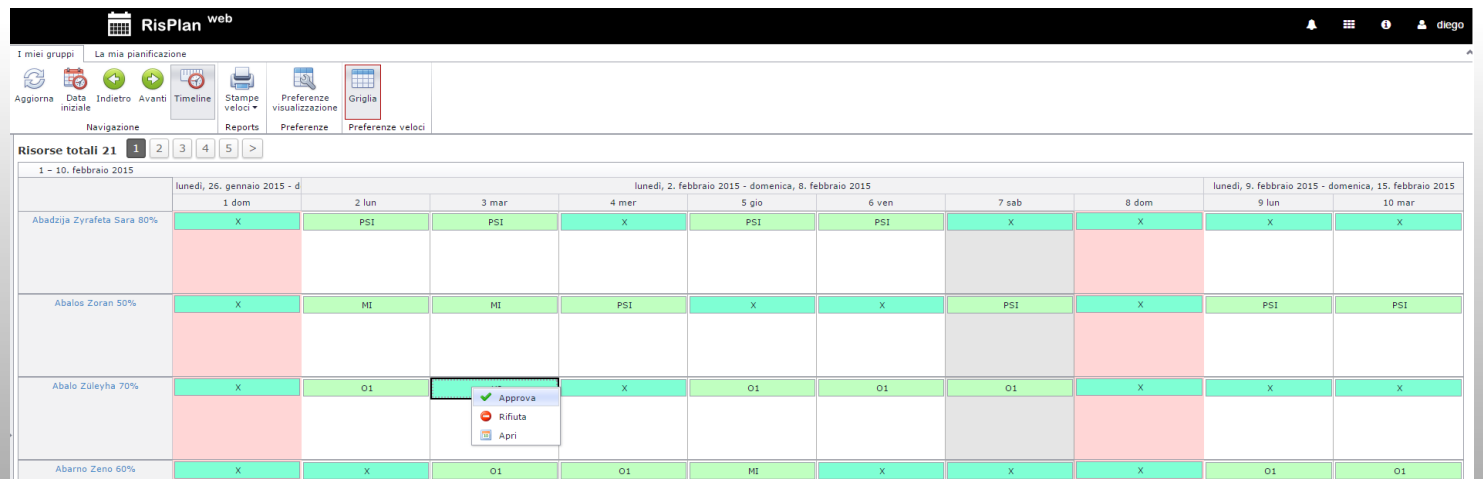

Access real time, updated employee's queries and shiftplanning info, wherever you or your resources are!

Say goodbye to paper!

All data is synchronized with the **RisPlan** central database and can be exported in many file formats towards different applications: HR, Payroll, etc.

Approved requests and changes appear in the main scheduler thus immediately updating the records of each employee who filed them.
